

Auger screw conveyor

The ADM Auger screw conveyor is made from stainless steel construction for hygienic and sanitary applications. The Auger screw conveyor offers a positive feed drive for all products conveyed. The Auger screw rotates inside an enclosed Stainless steel barrel and is driven via an electric motor. The ADM Auger screw conveyor is supplied with a hopper to offer constant product feed to the Auger screw and it comes on a stand with caster wheels for relocation and cleaning purposes. The Auger screw conveyor can be custom-made to various lengths, feed rates and with optional hopper sizes.

Types of Products conveyed include fine and coarse products, dense sticky products, fluid based products, etc
GRAIN, POWDER, FLOUR, BEAN, RICE

ADM-ASC Series

Features

- Screw conveyor
- Auger screw feed
- Hopper
- Stainless steel structure for hygienic applications
- Positive feed

Model	ADM-ASC
Type	Auger Screw
Hopper size	230 litre
Lift Capacity	Up to 1.2 m ³ / Hr
Power supply	415V, 50Hz, 1.1Kw
Discharge height	Approx 2.2m
Tube size	114mm o/d
